

## Professor Stephen Heppell

See [www.heppell.net](http://www.heppell.net)

CEO Heppell.net, Professor Bournemouth University, Chair in New Media Environments, Emeritus Professor Anglia Ruskin University, Visiting Professor University of Wales, Newport, Executive chairman LP+

Professor Stephen Heppell is an internationally acclaimed "leading voice" about the role of ICT in learning. His own global flourishing policy and learning consultancy has an enviable portfolio of international projects. He advises governments and national agencies throughout the world on the strategic development of ICT.

Stephen has been credited with being the person who put the "C" into ICT and the guiding "father" of early social networking and communities of educational practice. Currently he is at the heart of a global revolution in learning space design, with a string of major new building projects before him and a vast portfolio of successful, large scale, learning projects behind him. His research projects on the impact of new pedagogies on the design of learning spaces kickstarted a new rhetoric of school design in the UK and beyond.

*"Europe's leading online education expert"*  
**Microsoft 2006**

*"Money alone won't make the Internet fly. Ultimately, it's success lies with kids and other folk who don't follow dot-com stocks. That's where Stephen Heppell comes in. He's a digital do-gooder, helping to bring ordinary people into the Internet age.... looking about as threatening as Santa Claus with his twinkling blue eyes and bushy beard"*  
**Wall Street Journal 2000**

**Welcome to a view of the technology landscapes  
and the schools of the future!**

The Executive Director of the Association of Independent Schools of WA invites you to ...

## An afternoon with Professor Stephen Heppell

This is an exceptional opportunity for **LEADERS IN EDUCATION, ICT, CURRICULUM and SCHOOL DESIGN** to be immersed in the latest international thinking about learning environments and the innovative designs for learning and assessment that will better suit our current and future generations.

Stephen Heppell embraces the "constancy of change", pushes the boundaries of design and challenges audiences around the world to rethink the possibilities for the future with respect to harnessing the incredible potential of technology in education.

### Agenda:

- 1.00 – 2.30 pm *Stephen's formal presentation, during which comments and thoughts from the audience will be collected electronically*
- 2.30 – 3.00 pm *Afternoon tea and networking opportunity.*
- 3.00 – 4.00pm *A "conversation" forum with Stephen where questions and comments from the audience can be addressed in a more personalised way*

**Tuesday 28 September, 1:00 - 4:00 pm**

**Burswood on Swan, 1 Camfield Dr, Burswood**

**\$50 AISWA Members, \$80 Non-Members**

**ECAWA Members**, an excellent "pre ECAWA Conference" event!
