# AUSTRALIA 2020

Deloitte

## A Day of STEM Program

Experience the next-generation careers driving Australia's economic growth and innovation through 2020 and beyond.

Australia 2020, within the Day of STEM platform, examines key themes that are woven together to tell a story that brings to life exciting innovations in Australia's future such as: automated vehicles, drone delivery, secure banking, wireless technologies.

This exciting experience for students and teachers is the second program released under the Day of STEM platform. The program explores six unique careers with iconic Australian companies that are on the cutting-edge of technology and innovation in Australia. The program is designed to give students insight to the different jobs now appearing and the skills needed to succeed in 2020 and beyond.

Australia 2020 is being promoted through national education associations and their state level affiliates of teachers, schools and communities.

Teachers may run the Australia 2020 Vision in the classroom or as a homework exercise for students. To learn more about how to run the program please visit [www.dayofstem.com.au/2020Vision.html](http://www.dayofstem.com.au/2020Vision.html)
