WOMEN IN STEM

Explore the Careers of Australia's Women STEM Leaders

Program 3, within the Day of STEM platform, explores the careers of women STEM leaders who are at the forefront of industry. The program explores six dynamic female role models and their individual career journeys with companies on the cutting-edge of technological innovation in Australia. The virtual experience is designed to excite young women considering STEM careers through inspirational female mentors. Students will explore each mentor's journey, build a STEM resume, and participate in an interactive experience that explores multiple issues that each mentor experiences in the workplace.

The program is being promoted through Day of STEM's national education partners and their affiliated state level networks of schools in order to reach student populations across different regions in Australia.

Teachers may run the program in the classroom or as a homework excercise for students. To learn more the program please visit www.dayofstem.com.au.
